

You should be met with the following screen once you have tapped on  The website will auto-detect what installer you need for Eduroam to work on your device and will list it in the blue box (in this case – Android  or higher). If you tap this, you will be sent to the installation page.

The download should start automatically and will pop up at the bottom of your screen. Once it is complete, tap on it and it will open up the **geteduroam** app.

The Eduroam app will ask you to search for the College once again, and if you type BHASVIC in the search bar, it will appear at the top of the list.

BHASVIC

If you select BHASVIC from the list of colleges that come up, you'll be taken to the sign in page.

Your login details will be your BHASVIC email address (e.g Student.test23@students.bhasvic.ac.uk) and your password will be the same password that you use for college systems. Once these details are entered, you will gain access to the Eduroam WiFi network once you are on-site.
