

Psychology

Employability & Enterprise at BHASVIC

You will gain many transferable skills studying Psychology that will be valued in the workplace including:

Understanding different theories and analysing data, critical thinking, presentation skills, understanding different perspectives, discussion and presenting arguments

Studying psychology gives you a broad range of skills that span both science and the arts which opens up opportunities with many employers

Jobs where studying Psychology would be useful include:

- Advice worker
- Careers adviser
- Counsellor
- Detective
- Human resources officer
- Life coach
- Market researcher
- Play therapist
- Psychotherapist

Career Prospects

Jobs in psychology itself are incredibly competitive, so to stand a chance of securing one, you need to get a postgraduate qualification (probably a doctorate in most fields) and some relevant work experience.

But even though there are so many psychology graduates – far more than there are jobs in psychology – this subject has a lower unemployment rate than average because its students are so flexible and well-regarded by business. With a mix of good people skills and with excellent number and data handling skills, studying psychology ticks most employers' boxes.

Local Market Information
