

Chemistry

Higher Education at BHASVIC

In Sept 2018, 22 BHASVIC students went onto study Chemistry at 17 different universities, 30 students studied combined science at 14 units

A particularly popular combination is bio-chemistry.

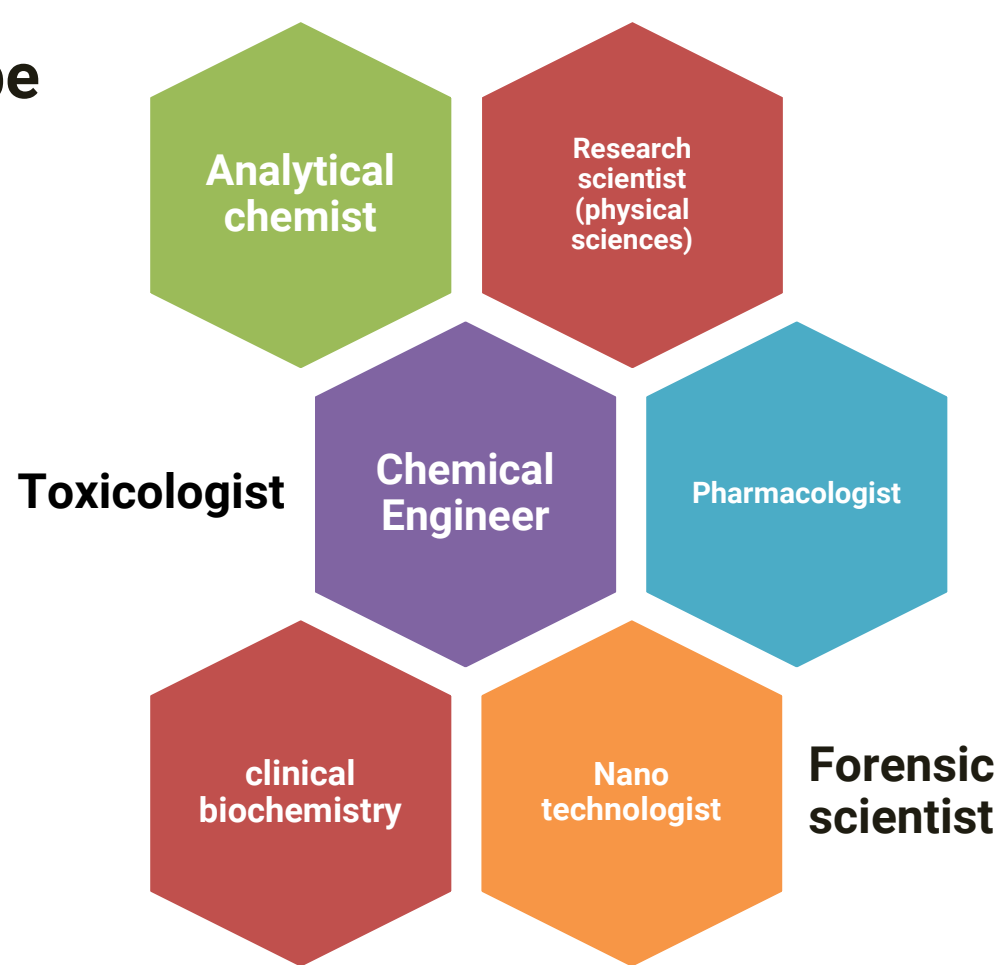

Chemistry A level is essential to study medicine degrees and some engineering (see separate info)

Studying chemistry opens doors to a range of sectors and opportunities both within and outside the lab

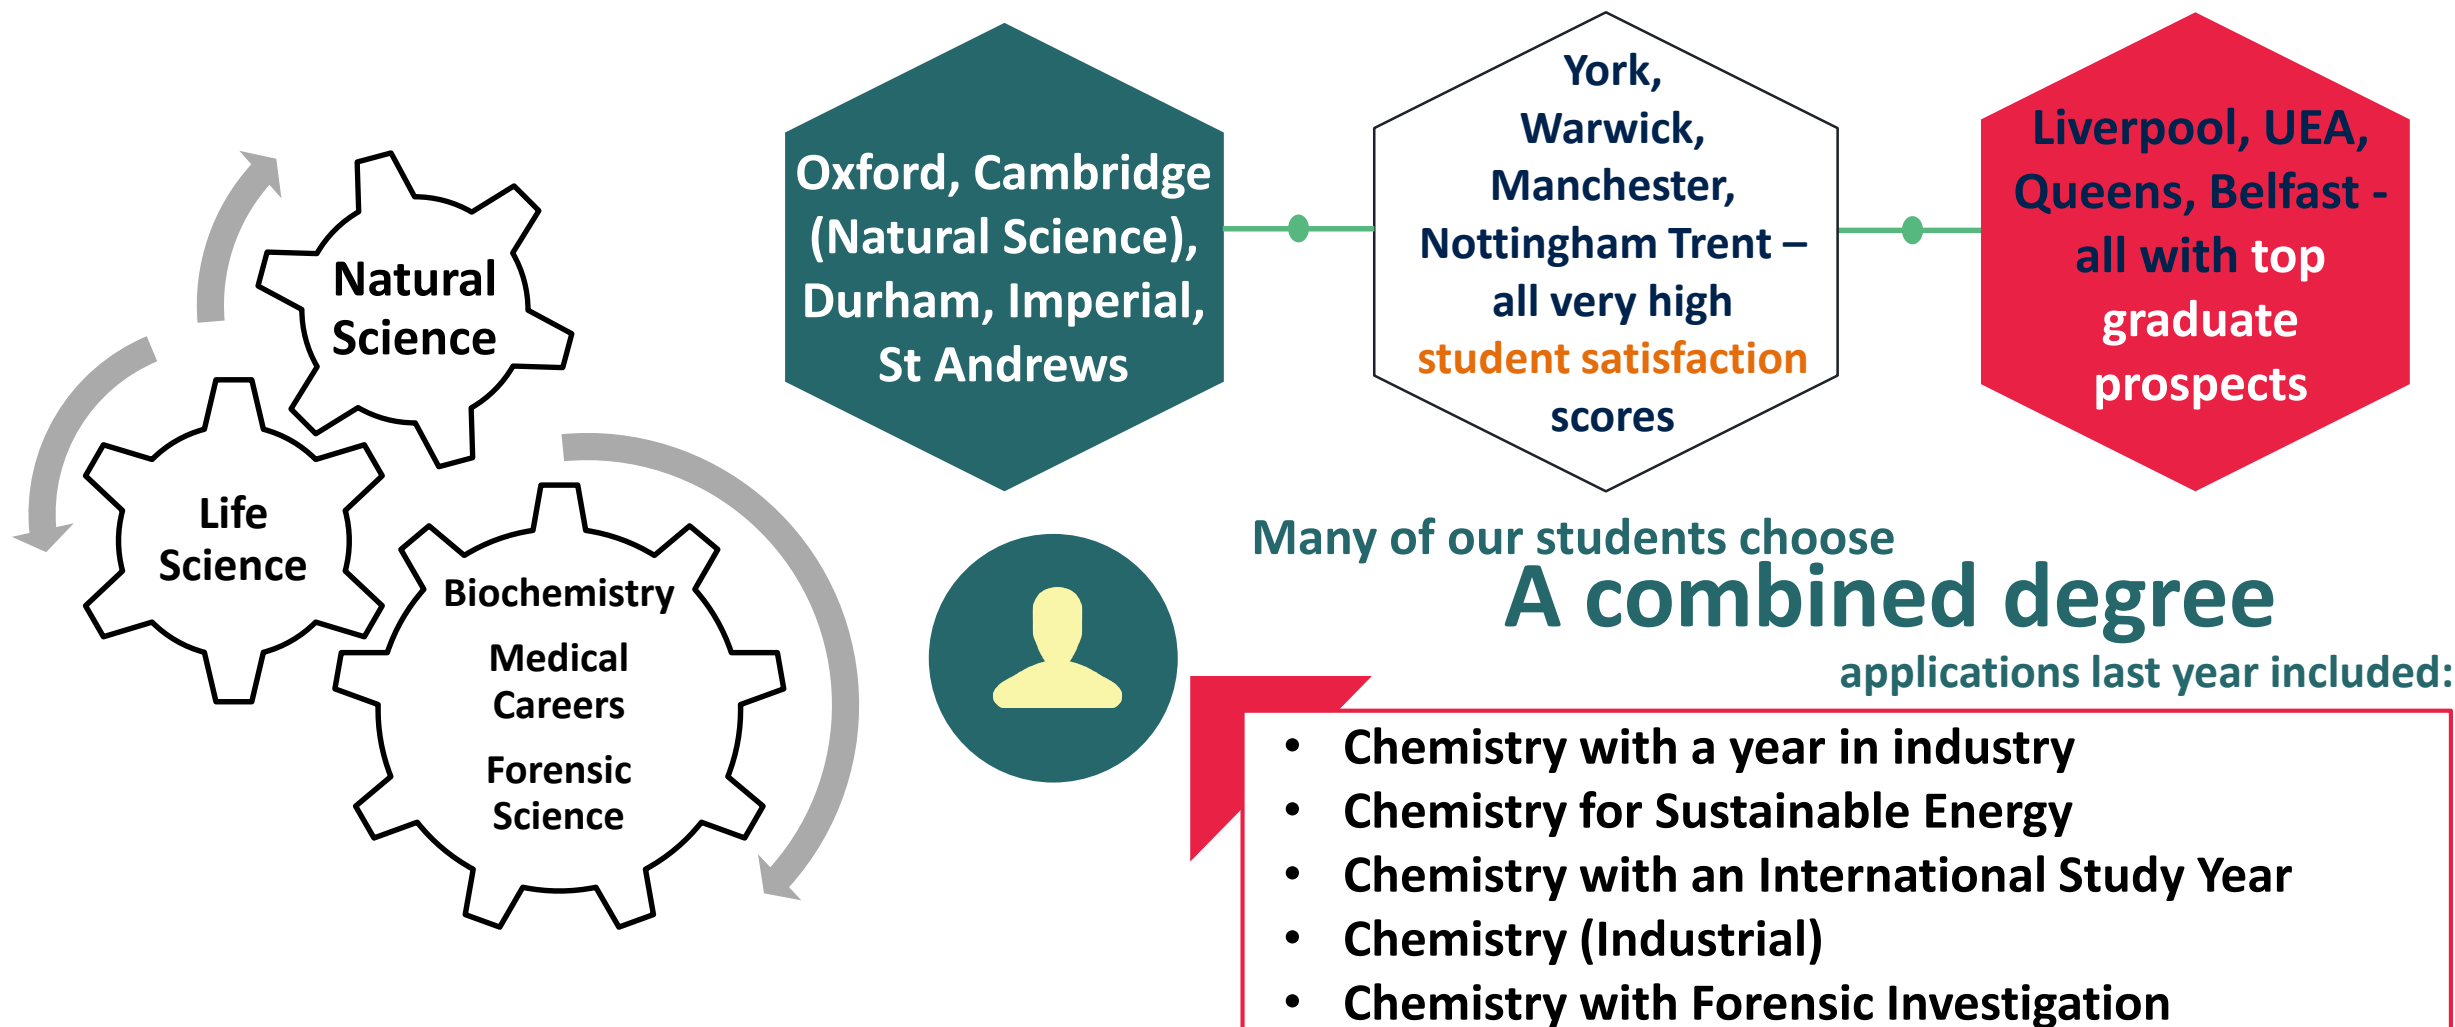

Jobs where a Chemistry degree would be useful include:

- Healthcare scientist
- Scientific laboratory technician
- Environmental consultant
- Higher education lecturer
- Management consultant
- Nuclear engineer
- Patent attorney
- Science writer
- Secondary school teacher
