

Photography

Higher Education at BHASVIC 2019

Many of our students choose to take a one year Art Foundation level 3/4 Diploma (equiv. to 2 A levels) before embarking on an arts degree

Last year **100 students** took this pathway, often studying at Brighton Met City College or Northbrook.

Joining a Visual Arts tutor group in A2 to support them in their applications, this helps them explore the wide variety of arts degrees available.

Arts universities such as Falmouth, Bournemouth and Norwich specialise in Visual Arts courses. In addition, 7 students chose direct entry to Photography degrees.

Should I study Photography at degree level?

Photography courses include composing and taking photographs and digital or darkroom techniques to manipulate images. You will learn a mix of technical and creative skills.

You may have very few official lectures often once a week followed by seminars – you will prepare with readings, summaries etc. beforehand. Guest lectures are usually exceptionally good.

Types of degree

- There are a range of different degree courses you can specialise in in addition to a Photography degree
- Marine
- Fashion
- Sports
- Wildlife
- Commercial
- Press
- Natural History

Entry Requirements
