

Psychology

Higher Education at BHASVIC 2019

In Sept 2019, 98 BHASVIC students went onto study Psychology-related degrees at 44 different universities

It is regularly in the **top two** subjects our students go onto study at university.

This includes students who went onto study **Criminology**, sometimes combined with Law.

Should I study Psychology at degree level?

How do children acquire language? Why do we forget things? What makes a good leader? If these sorts of questions interest you, psychology could appeal.

The BSc Psychology course starts off almost like an A-Level overlap in the first year, but gets rapidly more challenging, particularly noticeable with the neuroscience components.

Types of degree

- You can choose to study straight Psychology or a closely related subject, for example
- Criminology
- Behaviour
- Applied Psychology
- Criminal Psychology
- Forensic Psychology
