

NEW STUDENT ACCOUNTS – INSTRUCTIONS

New student accounts: The next important step for new students' move to BHASVIC involves them accessing the BHASVIC student email and Virtual Learning Environment (BHASVLE) accounts we have set up for them.

We are asking our new students to log in and begin their next steps with us on Monday 1st June.

To access their new accounts, we have sent an email to the email address the student used to apply to us. We have also sent a back-up email to the student's next of kin given on the application form. Could parents and carers check with their young person that they have received and acted upon the email? Sometimes, because we sent emails in bulk from BHASVIC, your email service provider may send our emails directly to your SPAM folder, so if no email from BHASVIC is in your inbox, please check your spam folder. If you have nothing from us in their either folder, please let us know by emailing admissions@bhasvic.ac.uk, clearly stating your young person's name and date of birth. We would like the student's personal email address *and* the student's next of kin email addresses too, so please include these all in your email contact to us.

Once our new students have accessed their BHASVIC student email and BHASVLE account, we will be providing induction materials, learning content and support via these platforms from Monday 1st June.
